

Industrial Security & CI Case Management Tool

Security meets Compliance meets Counterintelligence

Built by Counterintelligence and Industrial Security professionals, not generic SAAS developers

OPORD: 351X Deployment - Industrial Security Modernization

SITUATION: Industrial Security programs across the Defense Industrial Base are operating in fragmented environments - managing 20+ systems, duplicating data, and preparing for audits with limited time and personnel. This creates gaps in visibility, delays in reporting, and increased risk to compliance and mission assurance.

MISSION: 351X enables Facility Security Officers (FSOs), Insider Threat Program Senior Officials (ITPSOs), and Corporate Security leaders to consolidate Security, Compliance, and Counterintelligence into a single platform - enhancing visibility, reducing administrative burden, and strengthening organizational resilience.

EXECUTION: 351X integrates employee reporting, personnel security, and CI-driven analytics to eliminate duplicate processes and provide real-time insight into workforce risk.

SUSTAINMENT: Built by Counterintelligence professionals and developed in partnership with industry-leading FSOs, 351X is purpose-built for the Defense Industrial Base - scalable across facilities, adaptable to organizational structures, and aligned to evolving regulatory requirements.

COMMAND & SIGNAL: Schedule a demo to see how 351X simplifies your security program and eliminates operational friction.

Employee Reporting

- Foreign Travel/Debrief Reports
- Suspicious Activity Reports
- Content Recommendations
- Foreign Contact Reports
- Self-Reported Items

Foreign Owned, Controlled or Influenced (FOCI) Compliance

- Identify Affiliated Company Employer
- Track Parent Company
- Track Meeting Hours/Week
- GDPR Compliant

Training and Awareness

- Manage Mandatory Training
- Gain real-time metrics on completions
- Use internal reports to highlight organization specific threats and risks

Counterintelligence Analytical Support

- Employee Vulnerability Score
- Universal search function
- Employee dossier
- CI-Focused Country Risk Scores
- Print to .pdf

Industrial Security

- Personnel Clearance Information
- Visitor Access Request Tracking
- Modular Design by Facility and Department
- Enhanced User Management View

351X Subscription Prices

Annual subscriptions are \$35.10 per user

Security module is \$351.00 per admin

FOCI user add-on is \$7.02

FOCI admin add-on is \$70.20
